Formosa Plastics Corporation, U.S.A. COVID-19 Update

LIVINGSTON, NJ (April 2, 2020) – In response to the evolving situation regarding the novel coronavirus (COVID-19), please be advised that Formosa Plastics Corporation, U.S.A (“Formosa”) continues to work with our employees, contractors and the community to minimize the impacts of this illness.

At the present time, no FPC employees have tested positive for COVID-19. However, several contractors at our Point Comfort, TX facility have tested positive. Those contract employees have been isolated by their employer and notifications have been made to others with whom they may have closely interacted. We are working with all of our employees and contractors to ensure appropriate steps are taken to minimize transmission of this illness.

Since Formosa has been identified as critical infrastructure by the U.S. Department of Homeland Security, our manufacturing operations are continuing to run. Formolene® polyethylene and polypropylene resins, Formolon® polyvinyl chloride resins, caustic soda, bleach or any of our other products are currently being supplied without interruption.

For more information on Formosa Plastics Corporation, U.S.A., please visit our web site at www.fpcusa.com.

You expect more. And Formosa delivers.®

A member of the Alliance to End Plastic Waste.
