

FORMOSA—TEJANO WETLANDS

For more information log on to the Calhoun County ISD website at

www.calcoisd.org

and then click the Formosa Wetlands link.

Site Developments

The permit for drilling of the water well has been approved! Running water and fully functioning restroom facilities should be available by the beginning of the second semester.

**New entrance road
Entrance sign coming
soon...**

STUDENTS ALREADY ON SITE!

The wetland classroom has been up and running! To date, 375 students have already participated in outdoor activities.

Calhoun High School and Industrial High School Biology classes have utilized the wetlands to capture insects for their insect collections! Other CCISD Biology classes have gathered specimens to complete a plant survey project.

The Industrial ISD environmental science class has conducted chemical water quality testing.

Surveying the reservoir creatures!

The Edna ISD Middle School classes have conducted biological water quality surveys as well as ecosystem characteristics surveys.

Fred Collins from Kleb Woods Nature Preserve in Northern Harris County brought a tour group of 25 adults to view the wetlands migratory bird population.
