FORMOSA PLASTICS SITES ACHIEVE HISTORIC SAFETY MILESTONES

You expect more. And Formosa delivers.®

LIVINGSTON, NJ (*June 1, 2009; 10:00am*) – Formosa Plastics Corporation, U.S.A. is excited to announce that two of its production sites, Baton Rouge, Louisiana and Point Comfort, Texas, have each achieved historic milestones of 2,000,000 man-hours without a lost time injury. Combined, these two sites have now worked an amazing 4,000,000 man-hours without a single lost time injury.

For the Point Comfort site, this means that employees have worked safely for over nine months, since September 2008. For the Baton Rouge site, it means that employees have worked safely for over 54 months, since November 2004.

“We couldn’t be prouder of the employees who have contributed to these accomplishments,” noted Robert F. Kelley, Vice President of Formosa Plastics’ Environment, Safety and Communications Division. “It also reflects positively on the implementation of these sites’ safety training programs by all of their personnel.”

Randy Smith, Vice President and General Manager for the Point Comfort site stated, “This is a phenomenal feat, made possible by our dedicated employees. We congratulate everyone who contributed to this record-setting effort.” Kelly Serio, Vice President and Plant Manager at the Baton Rouge site added, “Everyone participated whole-heartedly to make this happen; we’re already looking forward to achieving 3,000,000 man-hours without a lost time injury.”

Recognition ceremonies will be held to acknowledge employees’ diligence at creating and maintaining a culture of safety awareness and excellence.

Formosa Plastics Corporation, U.S.A. is a vertically integrated producer of plastic resins and chemicals. Its polyethylene and polypropylene resins are marketed under the *Formolene*® trade name; its polyvinyl chloride resins are marketed under the *Formolon*® trade name. The company is headquartered in Livingston, NJ, has over 2,100 employees and is certified to the ISO 9001 quality management system and the ISO 14001 environmental management system.
