FORMOSA PLASTICS LAUNCHES NEW WEBSITE WITH EXPANDED E-BUSINESS FUNCTIONALITY AND INTERACTIVE CONTENT

You expect more. And Formosa delivers.®

LIVINGSTON, NJ (August 23, 2007)

Formosa Plastics Corporation, U.S.A. (Formosa) has just launched its new internet site; it's now available for use and viewing at www.fpcusa.com. Important changes and exciting improvements include:

- More up to date, and thorough, content on our company, products, operations, contacts and community activities.
- Faster, easier navigation including the functionality to move backward and open supplemental content in new viewing windows.
- A new e-business 'My Formosa' section where customers can check on their orders, suppliers can bid on our purchases and contractors can receive training (Texas). Employees can now check on the Livingston site closing information, and access the Formosa Online Store, from home.
- A wider variety of content such as short movies about the company, its efforts to restore the Tejano Wetlands in Texas and the recent million-hour safety achievement ceremony in Baton Rouge. Of course, the new corporate video and brochure are there, too!
- New brochures and pamphlets about our company, products and activities. The new Formosa Plastics Group (Taiwan) annual report is available on the site, also.
- An updated version of our very unique vertical integration diagram.

Future enhancements will include more extensive e-business tools on My Formosa, full site search capability and additional news and other resources.

Formosa Plastics Corporation, U.S.A. is a vertically integrated producer of plastic resins and chemicals. Its polyethylene and polypropylene resins are marketed under the Formolene® trade name; its polyvinyl chloride resins are marketed under the Formolon® trade name. The company is headquartered in Livingston, NJ, has over 2000 employees and is certified to the ISO 9001 quality management system and the ISO 14001 environmental management system.
