**Re: Formolene® Polypropylene Products Approved for Food Contact in the European Union**

Dear Valued Customer:

The following FPC USA products meet the food contact requirements for plastic materials covered under Directive 2011/10/EU. All monomers used in Formolene® polypropylene products are approved. Additives that are subject to restrictions, such as a Specific Migration Limit (SML), are defined below. If no SML is identified, then the regulation specifies 10 mg/dm<sup>2</sup> as the maximum overall migration from finished articles. In accordance with the EU Directive, migration should be measured using appropriate food stimulants or actual foodstuff at the real time and temperature conditions of use.

In all food applications, we recommend that the packager or manufacturer of the final product conduct appropriate tests to evaluate the possible contribution of the container to the aroma, taste and color of the food product.

If you have questions regarding EU food contact compliance for any Formosa Plastics Corporation product, please contact your Sales Representative.
