## Product Declaration - RoHS

March 19, 2010

### Subject: Product Declaration – RoHS

Dear Valued Customer:

This letter is in response to your request for product stewardship information related to the European Union's RoHS (Restriction of Hazardous Substances) Directive, citation 2002/95/EC, as enacted on January 27, 2003 and CONEG. We have reviewed the request and the raw materials used to produce our *Formolene*® polypropylene and polyethylene resins and *Formolon*® polyvinyl chloride resins. Formosa Plastics Corporation does not intentionally add any lead, cadmium, mercury, or hexavalent chromium or polybrominated biphenyls during the manufacture of these resins.

Hexavalent chromium compounds	< 0.1%
Cadmium and its compounds	< 0.01%
Mercury and its compounds	< 0.1%
Lead and its compounds	< 0.1%
Polybrominated diphenyl ethers (PBDEs)	< 0.1%
Polybrominated biphenyls (PBBs)	< 0.1%
Pentabromodiphenyl ether	< 0.1%
Octabromodiphenyl ether	< 0.1%
Decabromodiphenyl ether	< 0.1%

Furthermore, based upon our knowledge of the manufacturing process and information provided by our raw material suppliers, we would not expect these substances to be present in our final product. Analysis for these chemicals is not routinely performed on these products.

As the supplier of the raw material, we cannot make any claim with regard to the extruded or molded product or component made from these resins since this may be dependent on the process.

As always, *You expect more. And Formosa delivers*®. If you have any questions, please do not hesitate to contact me.
