Subject: Product Declaration – REACH Substance of Very High Concern (SVHC)

Dear Valued Customer:

Please be advised that, based on the information available to us from our raw material suppliers, all of the products listed below manufactured by Formosa Plastics Corporation, U.S.A. contain less than 0.1% of the SVHC's listed at: <http://echa.europa.eu/en/web/guest/candidate-list-table>, including the substances in the four agreements issued on January 12, 2017 (BPA, PFDA, PTAP and 4-HPbl) and the Candidate Lists issued on July 7, 2017 (PFHxS, BPA, BBP, DEHP, DBP, DIBP) & January 15, 2018:

- Caustic Soda
- Sodium Hypochlorite
- Formolon® Polyvinyl Chloride
- Formolene® Polyethylene
- Formolene® Polypropylene

Article 31.1.c of the REACH regulation requires suppliers of a listed substance or preparation to provide the recipient of that substance or preparation with a safety data sheet where a substance, or as part of a preparation, is included in the candidate list. To the best of our knowledge, none of these materials is generated during production.

Because we do not expect these materials to be present, we do not run any analysis on our raw materials or our finished products to measure for these materials. As the supplier of the raw material, we cannot make any claim with regard to the extruded or molded product or component subsequently made from these resins, since this may be dependent on the process and producer of such products.

As always, *You expect more. And Formosa delivers®*. If you have any questions, please contact your Sales Representative.

Sincerely,

Steve Rice
Senior Manager, Corporate Communications and Product Stewardship
