PRODUCT DECLARATION – SVHC

October 5, 2009

Subject: Product Declaration – REACH Substance of Very High Concern (SVHC)

Dear Valued Customer:

Please be advised that, based on the information available to us from our raw material suppliers, none of the current products listed below contain any of the candidate list of substances of very high concern (SVHC), or substances proposed to be listed as of October 1, 2009:

- Polyvinyl Chloride Resin
- Polyethylene Resin
- Polypropylene Resin
- Caustic Soda
- Sodium Hypochlorite
- Ethylene Dichloride

Article 31.1.c of the REACH regulation requires suppliers of a substance or preparation to provide the recipient of that substance or preparation with a safety data sheet where a substance as, or as part of a preparation is included in the candidate list.

According to our records, no Formosa Plastics products contain a candidate listed substance at > 0.1 wt%. To the best of our knowledge, none of these materials are generated during production. Because we do not expect these materials to be present, we do not run any analysis on our raw materials or our finished products to measure for these materials.

As the supplier of the raw material, we cannot make any claim with regard to the extruded or molded product or component subsequently made from these resins, since this may be dependent on the process and producer of such products.

As always, *You expect more. And Formosa delivers®*. If you have any questions, please do not hesitate to contact me.
