Re: Product General Declarations - Formolon® Dispersion (Specialty) PVC Resins

Dear Valued Customer:

Formolon® dispersion PVC resins are manufactured in Formosa Plastics' facilities in Texas and Delaware. Greater than 99 percent of all materials used in the manufacture of these resins are sourced from domestic suppliers. NAFTA Certificates of Origin are available upon request.

Please be advised that, to the best of our knowledge, the ingredients used, manufactured, and processed for *Formolon*® dispersion PVC resins do not contain any of the materials listed below. Based on our knowledge of the manufacturing process and information provided by our raw material suppliers, we would not expect these substances to be present in our final product. Analysis for these chemicals is not routinely performed. Please note that, as the supplier of the resins, Formosa Plastics Corporation, U.S.A. cannot make any claim with regard to extruded or molded products or components made from them.

Food Allergens

Formolon® dispersion PVC resins do not contain tree nuts, peanut products, soybean products, egg products, milk products, fish, shell fish, wheat products, sunflower seeds, poppy seeds, sesame seeds, or sulfites.

Genetically Modified Organisms

Genetically modified organisms are not used in the formulation or manufacture of *Formolon*® dispersion PVC resins.

Latex

To the best of our knowledge, the materials used, manufactured and processed for *Formolon*® dispersion PVC resins do not contain natural latex rubber or dry natural rubber.

Ozone Depleting Substances

Materials listed in the Clean Air Act Amendments of 1990 (Class I CFC's, Class II HCFC's and the solvents, carbon tetrachloride and 1,1,1-trichloroethane) are not used in the manufacture of *Formolon*® dispersion PVC resins.

Heavy Metals

These resins comply with the package requirements for heavy metals as set forth by the Coalition of Northeast Governors (CONEG), the California Toxics in Packaging Act and Article 11 of EU Directive 94/62/EC. Lead, cadmium, mercury, and hexavalent chromium are not used in the formulation or manufacture of *Formolon*® dispersion PVC resins. The sum of the incidental (non-intentionally added) concentrations of these heavy metals in *Formolon*® dispersion PVC resins does not exceed 100 parts per million by weight.

EU Restriction of Hazardous Substances (RoHS, RoHS3) Directives 2011/65/EU, 2015/863

These resins meet the safety and regulatory requirements for certification under this standard. Formosa Plastics Corporation, U.S.A. does not intentionally add lead, cadmium, mercury, hexavalent chromium,

polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE) or any of the four designated phthalates (DEHP, BBP, DBP and DIBP) during the manufacture of *Formolon*[®] dispersion PVC resins.

Pentabromodiphenyl Ether & Octabromodiphenyl Ether

Pentabromodiphenyl Ether & Octabromodiphenyl Ether are not used in the formulation or manufacture of *Formolon*[®] dispersion PVC resins. To the best of our knowledge, this product is in compliance with EU Directives 2003/11/EC and 76/769/EEC.

Phthalates & Bisphenol A (BPA)

Phthalates (DEHP, DBP, BBP, DINP, DIDP, DNOP) or Bisphenol A are not used in the formulation or manufacture of *Formolon*[®] dispersion PVC resins.

Glycidyl Ethers (BADGE, BFDGE, NOGE)

Bisphenol A diglycidyl ether (BADGE), Bisphenol F diglycidyl ether (BFDGE) and Novolac glycidyl ether (NOGE) are not used in the formulation or manufacture of *Formolon*[®] dispersion PVC resins.

Some *Formolon*[®] dispersion PVC resins may contain the ingredients listed below. Please refer to the Safety Data Sheet (SDS) for additional information.

California Proposition 65

Formolon[®] dispersion PVC products contain < 1 part per million (ppm), on average, of residual vinyl chloride monomer which is listed by the State of California under Proposition 65. Vinyl chloride is listed as a carcinogen with a no significant risk level of 3 µg/day.

Animal Derived Materials (incl. BSE/TSE)

Animal derived materials are used in the manufacture of some resin grades. However, these resin grades meet both European Union and U.S. Food & Drug Administration standards for being free from contamination with Bovine Spongiform Encephalopathy (BSE) and Transmissible Spongiform Encephalopathy (TSE) agents. Also, to the best of our knowledge, all materials used to clean this equipment and all test materials used in the validation of plant and equipment are similarly compliant. If you require a resin grade to be completely free of animal derived materials, please contact your Sales Representative.

As always, *You expect more. And Formosa delivers*[®]. If you have questions, please contact your Sales Representative.

Sincerely,

Steve Rice
Senior Manager, Corporate Communications and Product Stewardship
