- **Methods for Containment and Clean-Up:**
  - Collect spilled material using a method that controls dust generation such as a high efficiency particulate air (HEPA) vacuum.
  - Place waste in an appropriate container for disposal.
  - Use care during clean-up to avoid exposure to the material and injury from broken containers.

Section 7: Handling and Storage

- **Precautions for Safe Handling:**
  - Avoid inhalation and direct contact.
  - Avoid dust formation.
  - Accumulations of dust should be removed from settling areas.
- **Protection Against Fires and Explosions:**
  - Take precautions against static discharge.
  - To determine required precautions, consult applicable standards such as NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids (latest edition), and NFPA 499, Recommended Practice for the Classification of Combustible Dusts and of Hazardous (Classified) Locations for Electrical Installations in Chemical Process Areas.
Transfer and store in properly bonded and grounded containers.

**Conditions for Safe Storage:**
- Store in closed, properly labeled containers.
- Protect containers from heat, physical damage, ignition sources and incompatible materials.
- Have emergency equipment for fires and spills readily available.
