Re: Product General Declarations - Formolon® Dispersion (Specialty) Polyvinyl Chloride (PVC) Resins

Dear Valued Customer:

Formolon® specialty PVC resins are manufactured in Formosa Plastics' facilities in Texas. Greater than 99 percent of all materials used in the manufacture of these resins are sourced from domestic suppliers.

Please be advised that, to the best of our knowledge, the ingredients used, manufactured, and processed for Formolon® specialty PVC resins do not contain any of the materials listed below. Based on our knowledge of the manufacturing process and information provided by our raw material suppliers, we would not expect these substances to be present in our final product. Analysis for these chemicals is not routinely performed. Please note that, as the supplier of the resins, Formosa Plastics Corporation, U.S.A. cannot make any claim with regard to extruded or molded products or components made from them.

Food Allergens

Formolon® specialty PVC resins do not contain allergenic ingredients such as tree nuts, peanut products, soybean products, egg products, milk products, fish, shellfish (e.g. crustaceans and products), wheat products (e.g. gluten), sunflower seeds, poppy seeds, sesame seeds, celery and products, mustard and products or sulfites.

Genetically Modified Organisms

Genetically modified organisms are not used in the formulation or manufacture of Formolon® specialty PVC resins.

Latex

To the best of our knowledge, the materials used, manufactured and processed for Formolon® specialty PVC resins do not contain natural latex rubber or dry natural rubber.

Ozone Depleting Substances

Materials listed in the Clean Air Act Amendments of 1990 (Class I CFC's, Class II HCFC's and the solvents, carbon tetrachloride and 1,1,1-trichloroethane) are not used in the manufacture of Formolon® specialty PVC resins.

Heavy Metals

These resins comply with the package requirements for heavy metals as set forth by the Coalition of Northeast Governors (CONEG), the California Toxics in Packaging Act and Article 5 (4) of EU Regulation 2025/40. Lead, cadmium, mercury, and hexavalent chromium are not used in the formulation or manufacture of Formolon® specialty PVC resins. The sum of the incidental (non-intentionally added) concentrations of these heavy metals in Formolon® specialty PVC resins does not exceed 100 parts per million by weight.

EU Restriction of Hazardous Substances (RoHS, RoHS2, RoHS3, RoSH10) Directives 2002/95/EC, 2011/65/EU, 2015/863

These resins meet the safety and regulatory requirements for certification under this standard. Formosa Plastics Corporation, U.S.A. does not intentionally add lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE) or any of the four designated phthalates (DEHP, BBP, DBP and DIBP) during the manufacture of Formolon® specialty PVC resins.

Pentabromodiphenyl Ether & Octabromodiphenyl Ether

Pentabromodiphenyl Ether & Octabromodiphenyl Ether are not used in the formulation or manufacture of Formolon® specialty PVC resins.

Phthalates, Bisphenol A (BPA) and Bisphenol S (BPS)

Phthalates (DEHP, DBP, BBP, DINP, DIDP, DNOP), Bisphenol A and Bisphenol S are not used in the formulation or manufacture of *Formolon*® specialty PVC resins.

Glycidyl Ethers (BADGE, BFDGE, NOGE) – Epoxy Derivatives

Bisphenol A Diglycidyl Ether (BADGE), Bisphenol F Diglycidyl Ether (BFDGE) and Novolac Glycidyl Ether (NOGE) are not used in the formulation or manufacture of Formolon® specialty PVC resins. To the best of our knowledge, these resins are in compliance with EC Regulation 1895/2005.

PFOA, PFAS, PFOS, PFHxS and DMF

Perfluorooctanoic Acid (PFOA), Per- and Polyfluoroalkyl Substances (PFAS), Perfluorooctanesulfonic Acid (PFOS), Perfluorohexanesulfonic Acid (PFHxS) and Dimethyl Fumarate (DMF) are not used in the formulation or manufacture of Formolon® specialty PVC resins.

Animal Derived Materials (incl. BSE/TSE)

Formolon® specialty PVC resins are free of animal derived materials (ADM).

Some Formolon® specialty PVC resins may contain the ingredients listed below. Please refer to the Safety Data Sheet (SDS) for additional information.

California Proposition 65

Formolon® specialty PVC resins contain minor amounts of residual vinyl chloride monomer (RVCM) which is listed by the State of California under Proposition 65. Vinyl chloride is listed as a carcinogen with a no significant risk level of 3 µg/day. In addition, Formolon® specialty PVC copolymer resins contain residual amounts of the California Proposition 65 listed substance vinyl acetate monomer (RVAM). Additional information on RVCM and RVAM is available on the certificate of analysis provided with each shipment.

Additives and processing aids used in the manufacture of the Formolon® specialty PVC resins may contain chemicals listed under California Proposition 65.
